

To all of our patients and clients:

We want you to know that Enzer & Associates, PC takes the coronavirus pandemic very seriously. In our country there has been an exponential rise in people affected by this virus, and how to deal with this public health problem is evolving on a daily basis. As of March 12, 2020 we have seen cancellation of basically all large public gatherings and overseas travel. Schools are closing. The public is scared.

We are a medical office and are dedicated to helping people. Our highest priority during this crisis is to keep you and our staff healthy and safe. We are monitoring the situation very closely and taking active steps to ensure everyone's safety. To do so we are instituting a series of screening questions for every patient designed to limit the spread of illness. If we ask you to reschedule your appointment and/or contact your primary care provider, we hope you understand it is for your benefit and to protect our staff and our patients, some of whom are elderly or with serious medical conditions that could make catching this virus lethal.

Finally, if you do have a cough, cold, or fever, please call our office to reschedule your appointment. May we all stay healthy and hope this medical crisis passes quickly.

Sincerely,

Yoash R. Enzer, MD, FACS
Enzer & Associates, PC
