

New and Improved Facial Impressions 2021

Enzer & Associates, P.C. offers the most popular aesthetic services

(please check doctorenzer.com for the full list) and is placed among the top providers in Rhode Island and Southeast Massachusetts for procedures like Botox, Dysport, Juvederm, Restylane and more. However, the practice also offers a

number of sought-out procedures developed by Dr. Enzer himself as well as those not readily available from other providers, including:

1. Facial Scar Treatments

Many people are either turned away when they seek help for facial scarring or receive treatments that do not work. More than twenty years ago, Dr. Enzer developed FASULA, a technique that analyzes and treats facial scars (most commonly caused by acne), effectively reducing or eliminating them altogether.

2. Facial Mole and Blemish Removal

Facial moles or other marks create undesirable distractions, yet surgically

removing them will leave a scar. Dr. Enzer has successfully removed thousands of these unsightly blemishes using radiofrequency ablation, all while minimizing scar risks.

3. Elongated and/or Split Earlobe Piercing Hole Repair

Many people with earlobe piercings develop a longer hole, such that their earrings either fall out or do not sit properly. In worst-case scenarios, the earlobe may even split. Dr. Enzer has developed an effective technique to repair damaged earlobes, restoring them to their natural shape and ready to don those new sparkly earrings!

FAQs with Dr. Enzer

Q: When Should I Start Doing Cosmetic Procedures?

A: There is no set time when a person should have any given procedure. At Enzer & Associates, P.C., we stress health maintenance, starting with eating healthy, getting adequate sleep, exercising regularly, drinking enough water and protecting your skin from the sun. Along the same lines, we recommend starting to think about your aesthetic health from an early age, perhaps with a custom skincare plan, minor laser treatment, or another non-invasive procedure. Our goal is to build trusting long-term relationships with our patients.

Q: With so many aesthetic providers, why should I select Enzer & Associates, P.C.?

A: Trust, excellence and experience are paramount, and it starts with knowing the actual provider's name, their training and their reputation. Dr. Enzer provides all services himself, or directly supervises our nurse practitioner, Ashley Wright, N.P., our laser technician, and our aesthetician. We pride ourselves on delivering natural-looking outcomes because that is how you will look your best. We take the time to listen and talk with you, formulate a plan, and keep you comfortable during your treatment. All backed by a reputation for honesty and excellence, top training in aesthetic plastic surgery and more than twenty-eight years of experience.

Dr. Yoash Enzer established a private practice devoted to Cosmetic, Laser, and Reconstructive Oculofacial Plastic Surgery in 1993. Dr. Enzer is an Associate Clinical Professor at Brown University, board certified, and a member of ASOPRS and many other prestigious organizations. **Enzer & Associates, P.C., 120 Dudley St., Suite 104, Providence, 274-4464, doctorenzer.com**
